Digby Nova Scotia PARROT/DME Replacement – Public Comments Invited

March 14, 2024 – Transport Canada must determine whether the proposed Digby Nova Scotia PARROT/DME Replacement is likely to cause significant adverse environmental effects.

To help inform this determination, Transport Canada is inviting comments from the public respecting that determination. All comments received will be considered public and may be posted online. For more information, individuals should consult the [Privacy Notice](#).

Written comments must be submitted **by April 14, 2024** to:

The Proposed Project

NAV CANADA proposes to replace the existing Position Adjustable Range Reference Orientation Transponder (PARROT) navigation aid with a combined Distance Measuring Equipment (DME) and PARROT. The DME/PARROT site is located southeast of the community of West Dalhousie, Nova Scotia on West Dalhousie Road and the purpose is to provide navigational aid to aircraft operating in the area. The new DME/PARROT will consist of a new equipment shelter, communications tower, and fence, and a new utility pole will be installed to the east of the new tower to allow utilities to be connected. The existing PARROT will be dismantled after the construction of the new DME.
