Canadian Environmental Assessment Act
Comprehensive Study
Klinaklini Hydroelectric Development

Consultation on the Proposed Scope of the Project

Kleana Power Corporation proposes to develop a run-of-river hydroelectric power project on the Klinaklini River on the mainland coast of British Columbia, 167 km northeast of Campbell River, B.C. The proposed development would have an average power output of 280 MW, with the capacity to produce 700 MW at maximum river flows. The project consists of: a diversion weir intake, headpond, penstock/18km tunnel, powerhouse, tailrace, waste rock disposal, upgrades to existing logging roads, construction of new roads where required, upgrades of existing barge landing facility, and an aerial transmission line across Johnstone Strait and along Vancouver Island to Campbell River.

The project is subject to a comprehensive study under the *Canadian Environmental Assessment Act*. Pursuant to subsection 21(1) of the Act, Fisheries and Oceans Canada and Transport Canada, as the federal responsible authorities for the project assessment, now **invite the public to comment on the proposed scope of the project**, the factors to be considered and the ability of the comprehensive study to address issues relating to the project.

Written submissions received by Fisheries and Oceans Canada by **June 26, 2008**, will be considered. Interested persons may submit their comments in the official language of their choice to:

Fisheries and Oceans Canada
