To:

Panel Members,

It seems, that the increased bus and truck traffic on the access road will inevitably kill some animal, maybe even a grizzly bear, and so on.

Always a sad event, since animals do not sit at home and watch TV.

However, having read the submissions of these so called wilderness lodges, many of them, when the time comes, harbour these great hunters, from around the globe, who think nothing to shoot a treed cougar for a pelt, or a grizzly, to have a fur in front of a far away fire place, hmnn all for a great profit... These people really care about what ? The dirtiest profit of all,

Trophy hunting, legal they say. Why I ask ?

A mine will have an impact, no doubt, but a small one, in the big picture, seen the reclamation efforts at Brenda, Highland Valley and Gibraltar, the proponent has a great record, and is bound by 108 additional regulations by the B.C. govt.

I am a proud Canadian too, but I can't afford a chopper or a floatplane to see the back country, I need a road to see it.

Respectfully submitted,

H & G , Hofer
