COPY

Dear Dr. Binder:

Thank you for your letter of December 21, 2016, concerning the Deep Geologic Repository for Low and Intermediate Level Radioactive Waste Project as proposed by Ontario Power Generation (the proponent).

Further to our discussion on December 8, 2016, the additional information requested by the Minister was submitted by the proponent on December 28, 2016, and posted to the Canadian Environmental Assessment Agency's (the Agency) public registry on January 3, 2017.

On January 18, 2017, the Agency began a 30-day public comment period to assist in assessing the technical sufficiency and merit of the proponent's additional information. Your letter will be considered along with the submissions from other government departments and agencies, the public and Indigenous groups during this comment period.

Thank you for your input to the review process and the Agency looks forward to the continuing support of the Canadian Nuclear Safety Commission throughout the review of the additional information.

Yours sincerely,
<Original signed by>

Ron Hallman
