**Subject:** Response to question from Federal Participation Coordinator regarding federal department participation in PRM review

**Importance:** High

Hi Mai-Linh,

I have consulted the Panel in relation to your question "Do you know if the JRP will issue letters to the federal departments requesting for their expertise in reviewing the additional information that was filed last week, similar to what was issued for the sufficiency review of the EIS in June 2012?" The Panel expects that the federal departments participating in the process will continue to do so and provide their expertise for reviewing any additional information submitted by the proponent or others during the review process. The Panel would like you, as Federal Participation Coordinator, to inform the federal departments that are involved in the review of the proposed Pierre River Mine Project that the Panel expects their continued involvement. If you have any further questions, please let me know.

Best Regards,

Jill
