Thank you Gary,

In light of the suspension of this application, I will not be providing a response to the December 23, 2014 letter at this time but will ask that the Panel renew its request if it deems necessary at the appropriate time in the future.

I think that is a reasonable interpretation of what Shell requested. Shell stated it needed one year to file additional information to update its project proposal. The Panel stated that it needed the additional information from Shell before it could take the next steps in

the proceeding. The Panel asked Shell to provide its updated information in a timely fashion and also to update the Panel on its progress on a quarterly basis.

Thanks, I have been advised by ESRD staff that a news release indicated this application is on "hold". Is that your understanding as well?

Michelle,

Shell has asked for more time to update its application information and the joint review panel has agreed to provide that: <http://www.ceaa-acee.gc.ca/050/documents/p59539/98337E.pdf>

As a result, some of the information that Alberta may wish to provide comments on could change. Certainly, when Shell files the additional information Alberta and the public will have an opportunity to comment on the new information. I wanted to ensure that you and the departments are aware of this development.

Hi Gary,

I wanted to let you know that I am still working on getting instructions. I hope to have a response to the panel's letter in a few more weeks.

Thank you for your patience.
