

VOLUME 3: BIOPHYSICAL EFFECTS ASSESSMENTS

TABLE OF CONTENTS

10.0	BIOPHYSICAL SETTING	10-1
10.1	TERRESTRIAL SETTING	10-1
10.2	MARINE SETTING	10-2
10.2.1	Strait of Georgia	10-3
10.2.2	Intertidal Zone	10-5
10.2.3	High Intertidal Marsh.....	10-6
10.3	OVERVIEW OF ASSESSING ECOSYSTEM PRODUCTIVITY.....	10-7
10.3.1	Model Approach and Selection	10-9
10.3.2	Ecosystem Model Overview	10-10
10.3.3	Ecosystem Model Process	10-11
10.3.3.1	Step 1: Food Web Model	10-14
10.3.3.2	Step 2: Food Web Model over Time and Space (without Project).....	10-17
10.3.3.3	Step 3: Food Web Model over Time and Space (with Project) .	10-18
10.3.3.4	Step 4: Food Web Model over Time and Space (with Project and Proposed Onsite Offsetting)	10-19
10.3.3.5	Step 5: Sensitivity Analyses.....	10-20
10.3.4	Roberts Bank Ecosystem Model Predictions	10-21
10.3.5	Roberts Bank Ecosystem Model Validation.....	10-23
10.4	REFERENCES	10-24
11.0	MARINE VEGETATION EFFECTS ASSESSMENT	11-1
11.1	COMPONENT OVERVIEW AND REGULATORY SETTING	11-1
11.2	SELECTION OF MARINE VEGETATION VALUED COMPONENT	11-2
11.2.1	Sub-components	11-3
11.2.2	Indicators	11-5
11.3	ASSESSMENT BOUNDARIES	11-7
11.3.1	Spatial Boundaries	11-7
11.3.2	Temporal Boundaries	11-7
11.3.3	Administrative Boundaries	11-8
11.3.4	Technical Boundaries.....	11-8
11.4	INFORMATION SOURCES.....	11-9
11.4.1	Desktop and Field Studies.....	11-10
11.5	EXISTING CONDITIONS.....	11-11
11.5.1	Eelgrass	11-12
11.5.1.1	Overview.....	11-12
11.5.1.2	Ecological Value	11-12

	11.5.1.3	Abiotic Factors for Eelgrass	11-13
	11.5.1.4	Biotic Factors for Eelgrass.....	11-15
	11.5.1.5	Spatial and Temporal Variation of Eelgrass	11-15
11.5.2		Intertidal Marsh.....	11-17
	11.5.2.1	Overview.....	11-17
	11.5.2.2	Ecological Value	11-18
	11.5.2.3	Abiotic Factors for Intertidal Marsh.....	11-18
	11.5.2.4	Biotic Factors of Intertidal Marsh	11-19
	11.5.2.5	Spatial and Temporal Variation of Intertidal Marsh	11-20
11.5.3		Macroalgae	11-22
	11.5.3.1	Ulva.....	11-22
	11.5.3.2	Kelp.....	11-25
	11.5.3.3	Rockweed.....	11-26
11.5.4		Biomat	11-27
	11.5.4.1	Overview.....	11-28
	11.5.4.2	Ecological Value	11-28
	11.5.4.3	Abiotic Factors of Biomat	11-28
	11.5.4.4	Biotic Factors of Biomat.....	11-29
	11.5.4.5	Spatial and Temporal Variation of Biomat	11-29
11.5.5		Biofilm	11-29
	11.5.5.1	Overview.....	11-30
	11.5.5.2	Ecological Value	11-32
	11.5.5.3	Abiotic Factors of Biofilm	11-32
	11.5.5.4	Biotic Factors of Biofilm	11-37
	11.5.5.5	Spatial and Temporal Variation of Biofilm.....	11-37
11.5.6		Expected Conditions.....	11-45
11.6		FUTURE CONDITIONS WITH THE PROJECT	11-46
11.6.1		Mechanisms Affecting Productivity.....	11-51
	11.6.1.1	Direct Loss and Mortality	11-51
	11.6.1.2	Changes in Water Quality	11-51
	11.6.1.3	Changes to Sedimentation and Coastal Processes	11-54
	11.6.1.4	Biotic Interactions.....	11-54
11.6.2		Negligible Effects	11-55
	11.6.2.1	Changes in Water Quality	11-55
	11.6.2.2	Changes in Sedimentation and Coastal Processes	11-62
	11.6.2.3	Biotic Interactions.....	11-62
11.6.3		Potential Effect – Changes in Productivity.....	11-63
	11.6.3.1	Eelgrass	11-66
	11.6.3.2	Intertidal Marsh.....	11-69

	11.6.3.3	Macroalgae	11-71
	11.6.3.4	Biomat	11-73
	11.6.3.5	Biofilm	11-75
	11.6.3.6	Summary of Marine Vegetation Productivity Changes	11-84
	11.6.4	Potential Effect – Changes in Biofilm Assemblage Composition	11-89
11.7		MITIGATION MEASURES	11-92
	11.7.1	Avoidance Measures	11-92
	11.7.2	Reduction and Offsetting Measures	11-92
	11.7.2.1	Mitigation #1 for Changes in Sediment and Water Quality	11-93
	11.7.2.2	Mitigation #2 for Productivity Losses	11-93
	11.7.3	Summary of Mitigation Measures	11-94
11.8		CHARACTERISATION OF RESIDUAL EFFECTS AND CONTEXT	11-96
	11.8.1	Residual Effect – Changes in Biofilm Assemblage Composition	11-96
	11.8.2	Context of Residual Effects	11-99
11.9		DETERMINATION OF SIGNIFICANCE OF RESIDUAL ADVERSE EFFECTS	11-99
	11.9.1	Significance Definition	11-99
	11.9.2	Significance Determination	11-99
11.10		CUMULATIVE EFFECTS ASSESSMENT	11-101
11.11		SUMMARY OF RESIDUAL EFFECTS AND RESIDUAL CUMULATIVE ENVIRONMENTAL EFFECTS	11-102
11.12		MONITORING AND FOLLOW-UP PROGRAMS	11-102
11.13		REFERENCES	11-103
12.0		MARINE INVERTEBRATES EFFECTS ASSESSMENT	12-1
12.1		COMPONENT OVERVIEW AND REGULATORY SETTING	12-1
12.2		SELECTION OF MARINE INVERTEBRATES VALUED COMPONENT	12-2
	12.2.1	Sub-components	12-3
	12.2.2	Indicators	12-5
12.3		ASSESSMENT BOUNDARIES	12-6
	12.3.1	Spatial Boundaries	12-6
	12.3.2	Temporal Boundaries	12-7
	12.3.3	Administrative Boundaries	12-8
	12.3.4	Technical Boundaries	12-8
12.4		INFORMATION SOURCES	12-9
	12.4.1	Desktop and Field Studies	12-10
12.5		EXISTING CONDITIONS	12-12
	12.5.1	Infaunal and Epifaunal Communities	12-13
	12.5.1.1	Overview	12-13
	12.5.1.2	Ecological Function	12-14
	12.5.1.3	Population Characteristics	12-15
	12.5.1.4	Key Habitat Features	12-16

12.5.2	Bivalve Shellfish	12-17
12.5.2.1	Overview.....	12-17
12.5.2.2	Ecological Function	12-18
12.5.2.3	Population Characteristics.....	12-18
12.5.2.4	Key Habitat Features	12-19
12.5.2.5	Contamination	12-20
12.5.2.6	Traditional Use.....	12-21
12.5.3	Dungeness Crabs.....	12-22
12.5.3.1	Overview.....	12-22
12.5.3.2	Ecological Function	12-22
12.5.3.3	Population Characteristics.....	12-23
12.5.3.4	Key Habitat Features	12-26
12.5.3.5	Contamination	12-26
12.5.3.6	Traditional Use.....	12-27
12.5.4	Orange Sea Pens	12-27
12.5.4.1	Overview.....	12-27
12.5.4.2	Ecological Function	12-28
12.5.4.3	Population Characteristics.....	12-28
12.5.4.4	Key Habitat Features	12-30
12.5.5	Expected Conditions.....	12-31
12.6	FUTURE CONDITIONS WITH THE PROJECT	12-31
12.6.1	Mechanisms Affecting Productivity.....	12-38
12.6.1.1	Direct Mortality	12-38
12.6.1.2	Changes in Water Quality	12-39
12.6.1.3	Changes in Sedimentation and Coastal Processes	12-42
12.6.1.4	Changes in Habitat Availability	12-43
12.6.1.5	Biotic Interactions.....	12-43
12.6.2	Negligible Effects	12-43
12.6.2.1	Changes in Water Quality	12-44
12.6.2.2	Changes in Sedimentation and Coastal Processes	12-49
12.6.3	Potential Effect – Changes in Productivity.....	12-49
12.6.3.1	Changes in Productivity of Infaunal and Epifaunal Invertebrate Communities	12-53
12.6.3.2	Changes in Productivity of Bivalve Shellfish.....	12-59
12.6.3.3	Changes in Productivity of Dungeness Crabs	12-64
12.6.3.4	Changes in Productivity of Orange Sea Pens.....	12-67
12.6.3.5	Summary of Marine Invertebrate Productivity Changes.....	12-69
12.7	MITIGATION MEASURES.....	12-73
12.7.1	Avoidance Measures.....	12-74

12.7.1.1	Project Placement and Design	12-74
12.7.1.2	Timing Windows.....	12-74
12.7.2	Mitigation # 1 for Direct Mortality	12-74
12.7.2.1	Crab Salvages.....	12-75
12.7.2.2	Orange Sea Pen Transplant.....	12-75
12.7.3	Mitigation #2 for Changes in Sediment and Water Quality	12-75
12.7.4	Mitigation #3 for Productivity Losses – Offsetting	12-76
12.7.4.1	Eelgrass	12-76
12.7.4.2	Tidal Marsh.....	12-76
12.7.4.3	Mudflat	12-77
12.7.4.4	Sandy Gravel Beach.....	12-77
12.7.4.5	Subtidal Rock Reefs	12-77
12.8	CHARACTERISATION OF RESIDUAL EFFECTS AND CONTEXT	12-79
12.8.1	Residual Effect - Characterisation of Productivity Loss.....	12-79
12.8.2	Context of Residual Effects.....	12-83
12.9	DETERMINATION OF SIGNIFICANCE OF RESIDUAL ADVERSE EFFECTS	12-84
12.9.1	Significance Definition	12-84
12.9.2	Significance Determination.....	12-84
12.10	CUMULATIVE EFFECTS ASSESSMENT	12-86
12.11	SUMMARY OF RESIDUAL EFFECTS AND RESIDUAL CUMULATIVE ENVIRONMENTAL EFFECTS	12-87
12.12	MONITORING AND FOLLOW-UP PROGRAMS	12-87
12.13	REFERENCES	12-88
13.0	MARINE FISH EFFECTS ASSESSMENT	13-1
13.1	COMPONENT OVERVIEW AND REGULATORY SETTING	13-1
13.2	SELECTION OF MARINE FISH VALUED COMPONENT	13-3
13.2.1	Sub-components	13-5
13.2.2	Indicators	13-9
13.3	ASSESSMENT BOUNDARIES	13-10
13.3.1	Spatial Boundaries	13-10
13.3.2	Temporal Boundaries	13-12
13.3.3	Administrative Boundaries	13-15
13.3.4	Technical Boundaries.....	13-15
13.4	INFORMATION SOURCES.....	13-16
13.4.1	Desktop and Field Studies.....	13-17
13.5	EXISTING CONDITIONS.....	13-20
13.5.1	Pacific Salmon.....	13-20
13.5.1.1	Chum Salmon	13-23
13.5.1.2	Chinook Salmon	13-27
13.5.2	Reef Fish	13-32

	13.5.2.1	Lingcod	13-36
13.5.3		Forage Fish	13-38
	13.5.3.1	Pacific Sand Lance	13-39
	13.5.3.2	Surf Smelt	13-41
	13.5.3.3	Pacific Herring	13-44
	13.5.3.4	Shiner Perch	13-48
13.5.4		Flatfish	13-50
	13.5.4.1	English Sole	13-51
	13.5.4.2	Starry Flounder	13-53
13.5.5		Demersal Fish	13-55
	13.5.5.1	Threespine Stickleback	13-56
	13.5.5.2	Pacific Staghorn Sculpin	13-58
13.5.6		Expected Conditions	13-60
13.6		FUTURE CONDITIONS WITH THE PROJECT	13-61
13.6.1		Mechanisms Affecting Productivity	13-72
	13.6.1.1	Injury and Direct Mortality	13-72
	13.6.1.2	Changes in the Acoustic Environment	13-73
	13.6.1.3	Changes in Water Quality	13-77
	13.6.1.4	Changes in Sedimentation and Coastal Processes	13-80
	13.6.1.5	Changes in the Light Environment	13-81
	13.6.1.6	Changes in Habitat Availability	13-82
	13.6.1.7	Biotic Interactions	13-82
13.6.2		Negligible Effects	13-82
	13.6.2.1	Changes in Water Quality	13-83
	13.6.2.2	Changes in Sedimentation and Coastal Processes	13-89
	13.6.2.3	Changes in the Light Environment	13-91
13.6.3		Potential Effect - Changes in Productivity	13-92
	13.6.3.1	Changes in Productivity of Pacific Salmon	13-97
	13.6.3.2	Changes in Productivity of Reef Fish	13-102
	13.6.3.3	Changes in Productivity of Forage Fish	13-106
	13.6.3.4	Changes in Productivity of Flatfish	13-112
	13.6.3.5	Changes in Productivity of Demersal Fish	13-118
	13.6.3.6	Summary of Marine Fish Productivity Changes	13-122
13.7		MITIGATION MEASURES	13-131
13.7.1		Avoidance Measures	13-132
	13.7.1.1	Project Placement and Design	13-132
	13.7.1.2	Timing Windows	13-133
	13.7.1.3	Caisson Fish Habitat	13-133
13.7.2		Mitigation #1 for Injury and Direct Mortality	13-134

13.7.3	Mitigation #2 for Changes in Acoustic Environment	13-134
13.7.4	Mitigation #3 for Changes in Water Quality and Sediment.....	13-135
13.7.5	Mitigation #4 for Changes in the Light Environment	13-135
13.7.6	Mitigation #5 Offsetting Plan	13-136
13.7.6.1	Eelgrass	13-136
13.7.6.2	Tidal Marsh.....	13-136
13.7.6.3	Sandy Gravel Beach.....	13-137
13.7.6.4	Subtidal Rock Reef	13-137
13.8	CHARACTERISATION OF RESIDUAL EFFECTS AND CONTEXT	13-141
13.8.1	Residual Effect – Characterisation of Productivity Loss	13-141
13.8.2	Context of Residual Effects.....	13-146
13.9	DETERMINATION OF SIGNIFICANCE OF RESIDUAL ADVERSE EFFECTS	13-147
13.9.1	Significance Definition	13-147
13.9.2	Significance Determination.....	13-148
13.10	CUMULATIVE EFFECTS ASSESSMENT	13-150
13.10.1	Spatial Boundary for Marine Fish Cumulative Effects Assessment	13-151
13.10.2	Effects of Other Certain and Reasonably Foreseeable Projects and Activities	13-151
13.10.3	Cumulative Interactions and Potential Cumulative Effects.....	13-153
13.10.3.1	Loss of Subtidal Sand Habitat.....	13-153
13.10.3.2	Increased Underwater Noise	13-154
13.10.4	Mitigation Measures for Cumulative Effects.....	13-154
13.10.5	Characterisation of Residual Cumulative Effects and Context	13-154
13.11	SUMMARY OF RESIDUAL EFFECTS AND RESIDUAL CUMULATIVE ENVIRONMENTAL EFFECTS	13-155
13.12	MONITORING AND FOLLOW-UP PROGRAMS	13-155
13.13	REFERENCES	13-156
14.0	MARINE MAMMALS EFFECTS ASSESSMENT.....	14-1
14.1	COMPONENT OVERVIEW AND REGULATORY SETTING	14-2
14.1.1	Endangered and Threatened Species under <i>Species at Risk Act</i>	14-2
14.1.1.1	Southern Resident Killer Whale	14-3
14.2	SELECTION OF MARINE MAMMALS VALUED COMPONENT	14-5
14.2.1	Sub-components	14-8
14.2.2	Indicators	14-9
14.3	ASSESSMENT BOUNDARIES	14-10
14.3.1	Spatial Boundaries	14-10
14.3.2	Temporal Boundaries	14-12
14.3.3	Technical Boundaries.....	14-13
14.4	INFORMATION SOURCES.....	14-14
14.4.1	Southern Resident Killer Whale Technical Advisory Group Process	14-15

14.4.2	Desktop and Field Studies.....	14-16
14.4.3	Habitat Use Studies.....	14-19
14.4.4	Critical Habitat Feature – Acoustic Environment	14-20
14.4.4.1	Southern Resident Killer Whale-specific Behavioural Disturbance Threshold Study	14-20
14.4.4.2	Underwater Noise Exposure and Acoustic Masking Model	14-21
14.4.4.3	Population Consequence of Disturbance Model	14-21
14.4.5	Critical Habitat Feature – Availability of Prey.....	14-22
14.4.6	Critical Habitat Feature – Water and Sediment Quality.....	14-22
14.5	EXISTING CONDITIONS.....	14-23
14.5.1	Southern Resident Killer Whale.....	14-23
14.5.1.1	Life History	14-23
14.5.1.2	Abundance	14-24
14.5.1.3	Distribution.....	14-25
14.5.1.4	Southern Resident Killer Whale Life Functions and Critical Habitat Features.....	14-28
14.5.1.5	Past and Current Threats.....	14-34
14.5.2	North Pacific Humpback Whale	14-35
14.5.2.1	Life History	14-35
14.5.2.2	Abundance	14-36
14.5.2.3	Distribution.....	14-37
14.5.2.4	Threats	14-38
14.5.3	Steller Sea Lion	14-39
14.5.3.1	Life History	14-39
14.5.3.2	Abundance	14-40
14.5.3.3	Distribution.....	14-40
14.5.3.4	Threats	14-42
14.5.4	Expected Conditions.....	14-44
14.6	FUTURE CONDITIONS WITH THE PROJECT	14-44
14.6.1	Negligible Effects from the Project.....	14-51
14.6.1.1	Acoustic Environment – In-Air Noise	14-51
14.6.1.2	Environmental Contamination – Air Pollution	14-51
14.6.1.3	Availability of Prey	14-52
14.6.1.4	Changes in Water and Sediment Quality.....	14-52
14.6.2	Potential Effects of the Project on Southern Resident Killer Whales	14-53
14.6.2.1	Changes to the Acoustic Environment	14-54
14.6.2.2	Physical Disturbance – Vessel Strikes	14-72
14.6.2.3	Summary of Changes to Southern Resident Killer Whale Critical Habitat and Life Functions from Project-related Effects	14-73

14.6.3	Potential Effects of the Project on North Pacific Humpback Whale	14-73
14.6.3.1	Changes to the Acoustic Environment	14-74
14.6.3.2	Physical Disturbance from Vessel Strikes	14-76
14.6.4	Potential Effects of the Project on Steller Sea Lions.....	14-76
14.6.4.1	Changes in the Acoustic Environment.....	14-76
14.6.4.2	Physical Disturbance from Vessel Strikes	14-79
14.7	MITIGATION MEASURES	14-79
14.7.1	Mitigation of Acoustic Disturbance.....	14-80
14.7.1.1	Mitigating Underwater Noise during Construction Activities.....	14-80
14.7.1.2	Mitigation of Underwater Noise during Operation Activities.....	14-81
14.7.2	Mitigation of Physical Disturbance from Vessel Strikes during Operation Activities	14-82
14.8	CHARACTERISATION OF RESIDUAL EFFECTS AND CONTEXT	14-83
14.8.1	Characterisation of Acoustic Disturbance from Operational Noise.....	14-85
14.8.1.1	Southern Resident Killer Whale	14-86
14.8.1.2	North Pacific Humpback Whale	14-87
14.8.1.3	Steller Sea Lion.....	14-87
14.8.2	Context of Residual Effects.....	14-87
14.8.2.1	Southern Resident Killer Whale	14-88
14.8.2.2	North Pacific Humpback Whale	14-89
14.8.2.3	Steller Sea Lion.....	14-89
14.9	DETERMINATION OF SIGNIFICANCE OF RESIDUAL ADVERSE EFFECTS	14-90
14.9.1	Significance Definition	14-90
14.9.1.1	Southern Resident Killer Whale	14-90
14.9.1.2	North Pacific Humpback Whale and Steller Sea Lion	14-90
14.9.2	Significance Determination.....	14-90
14.9.2.1	Southern Resident Killer Whales	14-91
14.9.2.2	North Pacific Humpback Whale	14-91
14.9.2.3	Steller Sea Lion	14-92
14.9.2.4	Marine Mammal Valued Component Summary	14-92
14.10	CUMULATIVE EFFECTS ASSESSMENT	14-92
14.10.1	Cumulative Interactions and Potential Cumulative Effects.....	14-94
14.10.1.1	Southern Resident Killer Whale	14-94
14.10.1.2	North Pacific Humpback Whale	14-100
14.10.1.3	Steller Sea Lion.....	14-100
14.10.2	Mitigation Measures for Cumulative Effects.....	14-100
14.10.3	Characterisation of Residual Cumulative Effects and Context	14-101
14.10.4	Significance Determination for Residual Adverse Cumulative Effects	14-101
14.11	SUMMARY OF RESIDUAL EFFECTS AND RESIDUAL CUMULATIVE ENVIRONMENTAL EFFECTS	14-103

List of Appendices

Appendix 10-A	Species at Risk – Information on Federal and Provincial Designations
Appendix 10-B	Roberts Bank Ecopath with Ecosim and Ecospace Model Parameter Estimates
Appendix 10-C	Roberts Bank Ecosystem Model Development and Key Run
Appendix 10-D	Roberts Bank Spatial Ecosystem Model Sensitivity Analysis
Appendix 11-A	Rationale for Exclusion of Other Certain and Reasonably Foreseeable Projects and Activities in the Cumulative Effects Assessment of Marine Vegetation
Appendix 12-A	Habitat Suitability Modelling
Appendix 12-B	Rationale for Exclusion of Other Certain and Reasonably Foreseeable Projects and Activities in the Cumulative Effects Assessment of Marine Invertebrates
Appendix 13-A	Fraser River Chinook Salmon Stock Nomenclature and Stock Status
Appendix 13-B	Chinook Abundance Index
Appendix 13-C	Rationale for Inclusion/Exclusion of Other Certain and Reasonably Foreseeable Projects and Activities in the Cumulative Effects Assessment of Marine Fish
Appendix 14-A	Rationale for Inclusion or Exclusion of Other Certain and Reasonably Foreseeable Projects and Activities in the Cumulative Effects Assessment of Marine Mammals
Appendix 14-B	Southern Resident Killer Whale Noise Exposure and Acoustic Masking Technical Report
Appendix 14-C	Southern Resident Killer Whale Population Consequence of Disturbance Model
Appendix 14-D	Changes in Polychlorinated Biphenyl Exposures of Southern Resident Killer Whales Associated with Roberts Bank Terminal 2 Disposal at Sea
Appendix 15-A	Coastal Bird Species of Conservation Concern with the Potential to Occur in the Local Assessment Area
Appendix 15-B	Shorebird Foraging Opportunity during Migration
Appendix 15-C	Overwintering Dunlin Foraging Opportunity
Appendix 15-D	Assessment of Changes to Predation Risk to Shorebirds
Appendix 15-E	Coastal Birds Supporting Figures
Appendix 15-F	Rationale for Inclusion / Exclusion of Other Certain and Reasonably Foreseeable Projects and Activities in the Cumulative Effects Assessment of Coastal Birds
Appendix 17-A	Proposed Onsite Habitat Concepts
Appendix 17-B	Habitat Concept Drawings
Appendix 17-C	Onsite Offsetting Concepts - Productivity Assessment

AUTHORSHIP AND PROFESSIONAL CREDENTIALS

Environmental Impact Statement

Section	Contributors and Credentials	Affiliation
10.0 Biophysical Setting	Anika Calder, M.E.S.	Hemmera Envirochem Inc.
	Robin Taylor, M.R.M., E.P.	Hemmera Envirochem Inc.
	Pamela O’Hara, R.P.Bio.	Hemmera Envirochem Inc.
11.0 Marine Vegetation Effects Assessment	Brock Ramshaw, M.Sc., R.P.Bio.	Hemmera Envirochem Inc.
	Christopher Martin, M.Sc., R.P.Bio	WorleyParsons Canada
	Mary Lou Lauria, PhD	WorleyParsons Canada
	Benjamin Wheeler, M.Sc., R.P.Bio	Hemmera Envirochem Inc.
12.0 Marine Invertebrates Effects Assessment	Marina Winterbottom, MMM	Hemmera Envirochem Inc.
	Benjamin Wheeler, M.Sc., R.P.Bio	Hemmera Envirochem Inc.
13.0 Marine Fish Effects Assessment	Romney McPhie M.Sc.	Hemmera Envirochem Inc.
	Marina Winterbottom, MMM	Hemmera Envirochem Inc.
	Benjamin Wheeler, M.Sc., R.P.Bio	Hemmera Envirochem Inc.
14.0 Marine Mammals Effects Assessment	Sonya Meier, M.Sc., R.P.Bio.	Hemmera Envirochem Inc.
	Benjamin Wheeler, M.Sc., R.P.Bio	Hemmera Envirochem Inc.
15.0 Coastal Birds Effects Assessment	James Rourke, M.Sc., R.P.Bio.	Hemmera Envirochem Inc.
	Benjamin Wheeler, M.Sc., R.P.Bio	Hemmera Envirochem Inc.
16.0 Ongoing Productivity of Commercial, Recreational, and Aboriginal Fisheries Effects Assessment	Marina Winterbottom, MMM	Hemmera Envirochem Inc.
	Scott Toews, M.Sc.	Hemmera Envirochem Inc.
	Benjamin Wheeler, M.Sc., R.P.Bio	Hemmera Envirochem Inc.
17.0 Mitigation for Marine Biophysical Valued Components	Robin Taylor, M.R.M., E.P.	Hemmera Envirochem Inc.
	Derek Nishimura, M.Sc., R.P.Bio.	Hemmera Envirochem Inc.
