Subject: RBT2 panel review

Dear Mr. Goold,

Thank you for your correspondence of November 27, 2019, requesting that the Review Panel for the Roberts Bank Terminal 2 Project consider in its environmental assessment report information provided by the S'olh Temexw Stewardship Alliance. The information provided to the Panel is in relation to the potential environmental effects of the Project and how those effects are related to the Stó:lō Nation's Aboriginal held rights within S'olh Temexw.

The Panel has asked me to respond on their behalf.

As you noted in your e-mail, the Panel closed the public record for the review on August 26, 2019. After considering your request, the Panel has decided to keep the record closed to any further submissions and therefore will not be able to accept your attached report. This approach is consistent with how the Panel has approached other similar requests from participants.

Sincerely,

Cindy Parker
