

REGIONAL ASSESSMENT OF OFFSHORE WIND DEVELOPMENT IN NOVA SCOTIA – UPDATE

September 2024

The Committee for the Regional Assessment of Offshore Wind Development in Nova Scotia has continued to focus on writing the Draft Report in September.

Posting of the Draft Report to the Registry is planned for mid-October in order to incorporate additional feedback that has been received from participants. The Committee is committed to delivering a comprehensive and accurate report which will allow for a more meaningful public comment period. A 60-day public comment period will commence immediately after the report is posted. This time provides an opportunity for all participants of the Regional Assessment to provide their feedback on the Draft Report.

The Committee will consider all comments and feedback towards the finalization of their report. The Final Report will be submitted to the Minister on January 23, 2025. Note that the Committee's Agreement states that the Minister will make the Final Report public.

All information about the Regional Assessment is available on the [Regional Assessment Registry page](#).
