

REGIONAL ASSESSMENT OF OFFSHORE WIND DEVELOPMENT IN NOVA SCOTIA – UPDATE

October 2024

The Committee for the Regional Assessment of Offshore Wind Development in Nova Scotia continued to focus on writing the Draft Report in October.

The [Draft Regional Assessment Report](#) was posted to the Registry on October 31, 2024 for a 50-day public comment period. The Committee was committed to delivering a comprehensive and accurate report which will allow for a more meaningful public comment period, therefore the posting was delayed in order to incorporate additional feedback that was received.

The Committee now invites all Indigenous peoples, the public, organizations, and any other person or group to review and provide comments on the Draft Report until **11:59 p.m. on December 20, 2024**. Comments can be submitted via the Regional Assessment email (OffshoreWindNS-EolienneExtracotiereNE@iaac-aeic.gc.ca) or the public commenting tool. All comments received will be compiled and published on the Registry. Participants who wish to ask a question, or provide their input in a different format, can contact the Committee by writing to OffshoreWindNS-EolienneExtracotiereNE@iaac-aeic.gc.ca.

The Committee will consider all comments and feedback towards the finalization of their report. The Final Report will be submitted to the Minister on January 23, 2025. Note that the Committee's Agreement states that the Minister will make the Final Report public.

All information about the Regional Assessment is available on the [Regional Assessment Registry page](#).
