Object: Notification of a Request for Designation of the Clearwater Peat Harvesting Project - Due December 19, 2022

Dear Minister Guilbeault,

On November 28th, the Impact Assessment Agency of Canada asked information on the request to designate the proposed Clearwater Peat Harvesting Project (the Project) under subsection 9(1) of the *Impact Assessment Act* (IAA). The requested date to submit this information package is December 19th, 2022.

Premier Tech has been actively putting this information together, but we request a suspension of the time limit in accordance with subsection 9(5) of the IAA and the *Information and Management of Time Limits Regulations* to provide the Agency with information asked by the Agency.

We would therefore respectfully ask to have the submittal date moved ahead to January 11th, 2023.

We thank you for taking our request under consideration.

Sincerely,

<Original signed by>

Frédéric Caron
Natural Resource Manager and Quality Director
