Glossary

Term	Definition
Canadian Impact Assessment Registry (registry)	The Canadian Impact Assessment Registry is an internet site established and maintained by the Impact Assessment Agency of Canada and will be the official record of the integrated assessment process for the project.
Canadian Nuclear Safety Commission (CNSC)	As a lifecycle regulator, the CNSC regulates the use of nuclear energy and materials to protect health, safety, security and the environment in accordance with the <i>Nuclear Safety and Control Act</i> . The CNSC also implements Canada's international commitments on the peaceful use of nuclear energy, and disseminates objective scientific, technical and regulatory information to the public.
Hearing Procedures	Review panel document that provides an overview of how the public hearings will be conducted and explains how the public can participate in the hearings.
Integrated Impact Assessment (integrated assessment)	Review of the proposed project, led by a review panel that will meet the federal requirements for an integrated assessment under <i>the Impact Assessment Act</i> and the <i>Nuclear Safety and Control Act</i> .
<i>Impact Assessment Act</i> (IAA)	The Impact Assessment Act and its regulations form the legal framework for federal impact assessments.
Impact Assessment Agency of Canada (IAAC)	IAAC is a federal body accountable to the Minister of Environment and Climate Change. IAAC provides high-quality impact assessments that contribute to informed decision-making, in support of sustainable development. IAAC is the responsible authority for all federal impact assessments.
Integrated Review Panel (review panel)	An Integrated Review Panel is a group of independent experts appointed by the president of IAAC to conduct an integrated assessment. At least one review panel member is appointed from the CNSC's roster. The members are selected based on their knowledge or experience relative to the potential effects of the project or knowledge of Indigenous issues and must be free from bias or conflict of interest relative to the project.
Impact Statement	Detailed technical document prepared by the proponent as per the requirements set out in the Integrated Tailored Impact Statement Guidelines which would include the CNSC's requirements for the licence to prepare site.

<p>Memorandum of Understanding on Integrated Impact Assessments Under the <i>Impact Assessment Act</i> Between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission (MOU)</p>	<p>The Memorandum of Understanding on Integrated Impact Assessments Under the <i>Impact Assessment Act</i> Between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission creates an administrative framework within which IAAC and the CNSC can cooperatively allow for the exercise of the powers and duties established by the <i>Impact Assessment Act</i> and the <i>Nuclear Safety and Control Act</i>, as necessary, and as reflected in those Acts. The Memorandum of Understanding confirms the commitment of IAAC and the CNSC to work collaboratively to ensure that integrated assessments are conducted in an efficient manner.</p>
<p><i>Nuclear Safety and Control Act</i> (NSCA)</p>	<p>The Nuclear Safety and Control Act establishes the CNSC and sets out its mandate, responsibilities and powers.</p>
<p>Review Panel Secretariat</p>	<p>Staff members from IAAC and the CNSC who support the review panel in fulfilling its work and responsibilities and who operate within its deliberative privilege. In the case of a joint review panel, the secretariat may also include staff from another jurisdiction.</p>
<p>Participant</p>	<p>Broadly defined to mean anyone appearing at or participating in an integrated assessment process, including public hearings, consistent with the CNSC's Rules of Procedure.</p>
<p>Integrated Tailored Impact Statement Guidelines (integrated guidelines)</p>	<p>Document that provides direction and requirements for the proponent in preparing an Impact Statement.</p>

1. Introduction

On December 16, 2024, the Impact Assessment Agency of Canada (IAAC) determined that an impact assessment is required for the Bruce C Nuclear Project (the project), pursuant to section 16 of the *Impact Assessment Act* (IAA).

On the same day, IAAC, on behalf of the Minister of Environment and Climate Change Canada (Minister) referred the impact assessment to a review panel. Pursuant to section 43 of the IAA, the Minister must refer to a review panel designated projects that include physical activities regulated under the *Nuclear Safety and Control Act* (NSCA). The review panel will conduct an integrated impact assessment (integrated assessment) that follows the framework outlined in the [Memorandum of Understanding on Integrated Impact Assessments Under the *Impact Assessment Act* between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission](#) (the MOU).

The Public Participation Plan for the assessment of the project was developed by IAAC and the CNSC to set out opportunities for participation during the integrated assessment process. The Public Participation Plan describes the public participation as it is foreseen to unfold at this time in the process. The plan does not preclude IAAC, the CNSC or the review panel from making changes to the approaches described in this plan to adjust and develop engagement activities that are inclusive and responsive to the public needs, and to encourage meaningful public participation during the integrated assessment process. As this plan is now final and will not be changed, IAAC, the CNSC, and the review panel will communicate the latest available information on engagement and public participation through the tools described in Section 6.

For more information on public participation under the IAA, please see the [Framework: Public Participation Under the *Impact Assessment Act*](#) and [Guidance: Public Participation Under the *Impact Assessment Act*](#).

A distinct and separate [Indigenous Engagement and Partnership Plan](#) for the assessment of the proposed project is also available, outlining opportunities and methods for meaningful consultation and engagement with potentially affected Indigenous Nations and communities.

2. Description of the proposed project

Bruce Power (the proponent) is proposing the site preparation, construction, operation and decommissioning of a new nuclear generating station within the existing Bruce Power site, located in the Municipality of Kincardine, Ontario. As proposed, the project would provide up to 4,800 megawatt-electric of new nuclear generating capacity in Ontario and operate for 60 to 100 years. Several nuclear reactor technologies will be considered for the project.

As part of the integrated assessment process, the proponent will be submitting the information necessary to make an impact assessment decision and to make a licence to prepare site (LTPS) decision under the NSCA. The proponent may pursue subsequent licences to construct, operate, decommission at later stages, should the project receive a positive impact assessment decision and an LTPS. The assessment is being conducted in collaboration with the CNSC.

For more information on the integrated assessment of the project or to view the information and comments received, visit the [Bruce C Nuclear Project](#) page on the Canadian Impact Assessment Registry (the registry) at <https://iaac-aeic.gc.ca/050/evaluations/proj/88771>.

3. Objectives of Public Participation

The Public Participation Plan outlines the various ways participants may provide input and engage in the process. The following are IAAC's and the CNSC's objectives for public participation throughout the integrated assessment process:

- Public¹ participation is meaningful. This means that the public is provided with:
 - opportunities to take part in the integrated assessment;
 - the information they need to participate in a timely manner and in a format that is accessible; and
 - the capacity and resources to participate in an informed manner.
- The public is engaged early and often, especially in each key phase of the integrated assessment process.
 - The public brings forward key issues early in the process to inform the proponent's Impact Statement.
 - The proponent is continually informed about the concerns raised by participants.
 - The public was and will be involved in the development and/or revision of key documents. The public was involved in the revision of this plan and the [Integrated Tailored Impact Statement Guidelines](#) (integrated guidelines). The public will be involved in the revision of the draft review panel's Terms of Reference, the proponent's Impact Statement summary, and the draft potential conditions.
 - In the case of an assessment conducted by a review panel, a key opportunity for public participation includes participation in the public hearings.
- The selection of participation opportunities and mechanisms at each key phase in the process is based on the needs, interests, and values of the public, which will include, but are not limited to, comment periods, public hearings, and in-person or virtual information or consultation events.
- Public views heard throughout the process are tracked and inform decision-making.
- The objectives of this plan inform the review panel's Terms of Reference.

4. Identification of participants

¹ In the context of an integrated assessment, public typically refers to the general population, or residents, without reference to geographical limits of any city, town, or province.

IAAC and the CNSC invite all individuals, groups and organizations with an interest in the assessment of the project to participate in the process and related engagement activities.

Distribution List

During the integrated assessment process, IAAC, and the review panel, once established, will maintain a distribution list for the integrated assessment of the project. Participants on the distribution list will receive updates and notices about the integrated assessment for the project as the process progresses.

If you indicated that you would like to be added to the distribution list when you signed into the online registry or at an information session, please do not sign up again. In the event that your contact information changes, please contact us using the coordinates below to update your contact details.

If individuals or organizations would like to be on the distribution list, they can send an email to bruce@iaac-aeic.gc.ca with their full name and email address; or write a letter to IAAC at the address below with their name and mailing address. Individual's names will not be published.

Please consult the [Indigenous Engagement and Partnership Plan](#) for a list of the Indigenous Nations and communities that are identified for consultation or engagement as part of the integrated assessment of the project. The list may be updated throughout the consultation and engagement process as IAAC and the CNSC receive and gather more information on potential impacts of the project and Indigenous and treaty rights that may be affected.

5. Public participation tools

IAAC and the CNSC plan to use the following communication and engagement methods to ensure meaningful participation throughout the integrated assessment process. The methods listed include feedback received from the public during engagement events conducted by IAAC and the CNSC in April 2024 (see [What We Heard Update - April 2024](#)).

Increase awareness

To convey information and updates on the process, announce public participation opportunities, objectives of comment periods, and funding opportunities:

- Public notice(s) and key documents in plain language published on the registry, in public viewing centres (see Appendix), in newspapers, news websites, television and radio broadcasts, and mailouts;
- Plain language emails to the distribution list;
- In-person and virtual information sessions;

- In-person pop-up information booths; and
- Social media updates: https://x.com/search?q=%23BruceC&src=typed_query&f=top.

Build understanding

- Training opportunities about the integrated assessment process (as requested): <https://www.iaac-aeic.gc.ca/014/index-eng.aspx>;
- Information sessions and open houses to learn more about the project, the integrated assessment process and how to submit comments (held virtually or in-person);
- If appropriate, meetings, presentations, and workshops;
- Sharing plain language summaries of key documents, fact sheets, infographics, and presentation materials in an accessible format.

Participate and review

To meaningfully engage and receive input from communities most likely to be affected by the project:

- Public comment periods at key stages of the process;
- Posting of written comments and all other materials relevant to the assessment on the registry during public comment periods and throughout the process;
- Sharing summaries of what we heard following public comment periods; and
- Public hearings held by the review panel. This can include submitting written comments or coming in person to hearings to share information that could help with the assessment.

Note that this list is not exhaustive and may be adjusted during the course of the integrated assessment to facilitate public participation and to ensure efficient execution of the integrated assessment.

6. Activities and public participation approach

The following table provides a description of the main phases in the integrated assessment process, and an outline of engagement opportunities in each phase, including events led by IAAC, the CNSC, and the review panel. The table describes the objectives of each phase, the anticipated engagement activities that will be used, and the engagement methods that will support the activities.

The objectives of the Public Participation Plan will be considered for incorporation into the review panel's Terms of Reference. The review panel will select engagement activities that align with any rules or procedures it develops or adopts.

Table 1: Table of public participation approaches and activities

Phase 1: Planning - The Planning Phase is a maximum of 180 calendar days, excluding any time limit suspension.

This phase commenced on August 12, 2024, with the acceptance of the Initial Project Description (IPD).

Objectives of the Phase	Expected Activities and timelines	Public Participation Tools
<ul style="list-style-type: none"> • Support understanding of the project and its potential impacts. The integrated assessment process allows for early identification of issues and concerns. • Provide an opportunity for participants to apply for funding to support their participation in the planning phase of the integrated assessment. • Raise public awareness of the integrated assessment process, including opportunities for meaningful participation. • Gather public input and views on the draft integrated guidelines and the draft Public Participation Plan, prior to finalizing these documents. 	<ul style="list-style-type: none"> • From August 12 to October 28, 2024, IAAC and the CNSC invited comments on the summary of the Initial Project Description. This period included a time limit suspension, of 45 days, to allow for additional engagement during the planning phase. Comments received were used to prepare the Summary of Issues, which was provided to the proponent on November 6, 2024. • Virtual information sessions were held on August 20 and 21, 2024. • In October 2024, IAAC and the CNSC met with the Municipality of Kincardine, a representative from the local Mennonite community, and had a kiosk at the annual Pumpkin Fest event in Port Elgin, ON • From June 12, 2025, to July 11, 2025, IAAC and the CNSC invited comments on the draft integrated guidelines and the draft Public Participation Plan. • Information sessions (virtual), open house and meetings at the Davidson Centre, The Plex, and the Elgin Lodge Retirement 	<ul style="list-style-type: none"> • Notices on the registry, newspaper and radio, and social media updates. • Online comment periods (via the registry). • Meetings, information sessions, open house, pop-up/information booths, and/or workshops (virtual or in-person). The presentation slides used during information sessions and plain language summary of the draft Integrated Guidelines used for public engagement purposes were made available on the registry. • Community sessions, virtual or in-person, held in the communities most likely to be affected by the project. • Copies of key documents were placed in the viewing centers indicated in Appendix 1. IAAC and the CNSC continue to respond to any inquiries via the registry, by mail, or by phone.

	<p>Centre was held in the communities from June 23-27, 2025, to:</p> <ul style="list-style-type: none"> ○ Inform participants about the project and the integrated assessment process; and ○ Provide the opportunity to comment on the draft integrated guidelines and draft Public Participation Plan <ul style="list-style-type: none"> ● This phase ended with the posting of the Notice of Commencement of the Impact Assessment and related documents. ● IAAC and the CNSC continue to respond to any inquiries received via the registry, email, or phone. ● IAAC continues to administer participant funding to support participation in the integrated assessment process. 	
--	---	--

Phase 2: Impact Statement - The Impact Statement Phase is a maximum of 3 years (excluding any time limit extension).

This phase commenced on August 19, 2025, with the posting the Notice of Commencement of the Impact Assessment and related documents.

Objectives of the Phase	Expected Activities and Timelines	Public Participation Tools
<ul style="list-style-type: none"> ● Increase public awareness and understanding of the integrated assessment process and how to meaningfully participate. ● Encourage the public to provide information to the proponent to inform the development of the Impact Statement. 	<ul style="list-style-type: none"> ● IAAC and the CNSC will invite comments on the draft Terms of Reference for the review panel. ● IAAC and the CNSC will review the Impact Statement to determine whether all information and studies requested in the integrated guidelines have been provided. IAAC and the CNSC may request additional 	<ul style="list-style-type: none"> ● Public notices announcing participation opportunities on the registry, emails to the distribution list and updates on social media. ● Emails to the distribution list informing participants of key steps in the process. ● Posting of documents relevant to the integrated assessment and comments received on the registry.

<ul style="list-style-type: none"> • Notify participants of key steps in the process such as the receipt of the Impact Statement, the appointment of the review panel, and the opportunity to comment on the Summary of the Impact Statement. • Seek public and community knowledge related to environmental, social, health and economic impacts of the project. • Obtain feedback on the potential effects of the project and proposed mitigation measures to help the review panel understand views about the project and inform its assessment of potential effects (during the Impact Assessment Phase). • Review the proponent's Summary of the Impact Statement information and address any outstanding issues or deficiencies raised by the public. . • Seek public and community input on the draft Terms of Reference for the review panel. 	<p>information from the proponent if the Impact Statement does not conform to the integrated guidelines.</p> <ul style="list-style-type: none"> • IAAC and CNSC will invite comments on the Summary of the Impact Statement. The Impact Statement and the Summary of the Impact Statement will be posted to the registry, and a notification email will be sent to the distribution list. • IAAC and the CNSC will engage with the public to prepare for the Impact Assessment phase. • If applicable, IAAC and the CNSC will invite comments on any agreement with other jurisdictions pertaining to the establishment of a review panel or the coordination of assessment procedures. • IAAC and the CNSC will hold information sessions to explain the process and to provide an opportunity to comment on the Impact Statement. • The review panel members may be appointed and may attend cultural training with Indigenous Nations and communities and orientation activities. • This phase is complete when IAAC and the CNSC are satisfied that the proponent submitted all the information and studies required in the integrated guidelines. 	<ul style="list-style-type: none"> • Comment period (via the registry) on the proponent's Impact Statement Summary. • Comment period on the draft Terms of Reference for the review panel. • Information sessions (virtual or in-person) or open houses in the communities of those most likely to be affected by the project. IAAC and the CNSC will carry out these activities through existing community events, where feasible.
--	--	--

Phase 3: Impact Assessment - The time limit for the Impact Assessment Phase is up to 300 days.

The Impact Assessment Phase is led by the review panel and occurs, immediately after IAAC issues the notice under s.19(4) of the *Impact Assessment Act* indicating that it is satisfied that the proponent has submitted all necessary information and studies.

IAAC will establish the time limits for this phase including the time limit for the submission of the review panel report and for the posting of IAAC's recommendations on potential conditions on the registry.

Objectives of the Phase	Expected Activities & Timelines	Public Participation Tools
<ul style="list-style-type: none"> • Increase public awareness and understanding of the integrated assessment process, including opportunities for meaningful public participation, and encourage participants to take part in the public hearings. • Obtain the views of participants on the information contained in the Impact Statement and the draft procedures for the conduct of the public hearings to ensure the review panel sets up meaningful and accessible hearings for all participants. • In advance of the hearings, seek the following to inform the review panel's rationale, conclusion and recommendations: <ul style="list-style-type: none"> ○ Views or information on any topic that has been covered in the Impact Statement or is part of the scope of the assessment. • Obtain information via the hearings. 	<ul style="list-style-type: none"> • Establishment of the review panel and its mandate in the Terms of Reference. • The review panel may organize information sessions to explain activities and timelines related to the review panel process. • Public comment period(s), and information sessions held and determined by the review panel, in accordance with its Terms of Reference. • The review panel may ask for additional information of the proponent or participants before it determines that the information on the record is sufficient to proceed to a public hearing. • The review panel may hold a comment period on the draft public hearing procedures. • The review panel will be mandated to hold meaningful and accessible public hearing sessions in the communities most likely to be affected by the project. Participation timelines, dates, locations and duration for the public hearings will be determined by 	<ul style="list-style-type: none"> • Potential public comment period(s), and information sessions held and determined by the review panel • Public hearing sessions to discuss the project's potential effects, mitigation measures and follow-up program. • Written or oral submissions by participants by during the public hearings. • Public notices announcing the participation opportunities, emails to the distribution list and updates on social media. • Once the review panel record is closed, IAAC and the CNSC will continue to receive and post comments on the registry, but these will not be considered by the review panel and will not be part of the record.

	<p>the review panel and will be announced in a Notice of Public Hearing.</p> <ul style="list-style-type: none">• Following the close of the review panel record, the review panel will prepare its report. The report will contain the review panel's rationale, conclusion and recommendations.• IAAC will post a notice and email the distribution list to notify participants when the review panel's report has been submitted to the Minister and is posted on the registry.• IAAC will continue to administer funding to support participation in the integrated assessment process.	
--	--	--

Phase 4: Decision Making - The Decision-Making Phase is a maximum of 90 days, which starts following the posting of IAACs recommendations on potential conditions and ends with Governor in Council's decision.

<p>Objectives of the Phase</p> <ul style="list-style-type: none">• Inform the proponent and the public about the decision of Governor-in-Council.• Inform the public on the project conditions under the IAA as described in the Minister's decision statement.	<p>Expected Activities and Timelines</p> <ul style="list-style-type: none">• No engagement activities during this phase• IAAC will post the Decision Statement on the registry, including the reasons for the public interest determination and, if the project is allowed to proceed, the conditions with which the proponent must comply.• Where applicable, the Government of Canada issues a response to the review panel's recommendation that relates to federal mandates and interest.	<p>Public Participation Tools</p> <ul style="list-style-type: none">• Decision Statement will be posted on the registry.• Public notices, email sent to the distribution list and updates on social media.
---	--	--

Phase 5: Post Decision - The Decision Statement will expire if the proponent does not substantially begin to carry out the project within a certain period. This period is established by the Minister in Phase 4, considering views provided by the proponent.

If project receives a positive IA decision

Objectives of the Phase	Expected Activities and Timelines	Public Participation Tools
<ul style="list-style-type: none">• Inform the public on the review panel's licensing decision, including the project's conditions under the NSCA.• The public can comment at any time if they have concerns about a proponent not complying with the conditions of the project as set out by IAAC or the CNSC.• Inform the public of follow-up and monitoring activities and results from follow-up program.• Inform participants of potential amendments to the Decision Statement.• Inform participants on potential licensing amendments.• Participants may take part in follow-up and monitoring activities and inform IAAC of potential non-compliance.• Transfer the lead role for public engagement throughout the lifecycle of the project from IAAC to the CNSC.	<ul style="list-style-type: none">• The review panel makes the licensing decision, and if a licence is granted, issues the licence to prepare site.• IAAC and/or the CNSC post required follow-up and monitoring documents on the registry and/or the CNSC's website, according to the schedule identified in the Decision Statement.• The duration of a potential public comment period on potential amendments to the Decision Statement will be determined by IAAC and will be announced during the post-decision phase, on an as-needed basis.• IAAC transfers the lead role for public engagement in the regulatory oversight of the project to CNSC.• Post-decision communications activities related to nuclear licensing and regulatory oversight will be led by the CNSC. These include communications on participant funding, commission proceedings and decisions, and compliance.• The CNSC administers participant funding to support public participation in the future	<ul style="list-style-type: none">• Public notices, website postings, and emails sent to the distribution list and updates on social media.• Comment period (via the registry) on potential amendments to the Decision Statement.

	<p>licensing processes throughout the lifecycle of the project.</p> <ul style="list-style-type: none">• The CNSC is responsible for conducting compliance verification activities to confirm the licensee is meeting the conditions set out in their licence.	
--	---	--

7. Participant funding

Funding to support public participation is available. For information about who is eligible for funding or to apply for funding, visit [IAAC's Participant Funding Program](#).

For more information, contact IAAC's Funding Program by telephone at 1-866-582-1884 or by email at fp-paf@iaac-aeic.gc.ca.

Should the project be allowed to proceed after the integrated assessment process is complete, funding will be available in the post-decision phase through [CNSC's Participant Funding Program](#) to support public participation in future licensing processes throughout the lifecycle of the project.

8. Submitting comments

For the review panel to consider comments, they must be part of the project record and posted to IAAC's registry. Therefore, during the assessment, IAAC and the CNSC will rely primarily on the registry as the public record for comments. IAAC and the CNSC will work to streamline the collection and public dissemination of information while ensuring their respective legislative requirements are satisfied.

Comments may be submitted at any time during the integrated assessment by using the "Submit a comment" feature on the proposed project's page on the registry (reference number 88771, at [Bruce C Nuclear Project](#)). Attachments can be uploaded using this feature.

If you have any difficulties with the submission process, please contact IAAC and, when the review panel is appointed, the review panel's secretariat, using the contact information below. Comments may also be submitted by email or by regular mail. Note that the "Submit a comment" feature may be disabled from the time the review panel closes the record and prepares its report until the submission of the report to the Minister. Should IAAC conduct a comment period after the release of the report, the function would be reactivated, and a notice will be sent out to the distribution list.

Comments and other documents received by IAAC or the review panel will be part of the public project file and will be posted on the registry. IAAC's [Submission Policy](#) determines what information can be shared publicly and what information should remain private. For more information on how we protect your privacy, please refer to IAAC's [Privacy Notice](#). If you do not want your comment to be posted on the registry, please contact IAAC before submitting your comment.

9. Contact information

The IAAC office designated for administering the integrated assessment of the project in collaboration with the CNSC is:

Integrated Assessment for the Bruce C Nuclear Project
