

TABLE OF CONTENTS

(VOLUME 2)

8.0	ENVIRONMENTAL EFFECTS ASSESSMENT	8-1
8.1	PROJECT INTERACTIONS WITH THE ENVIRONMENT	8-2
8.2	ATMOSPHERIC ENVIRONMENT	8-3
8.2.1	Scope of Assessment	8-4
8.2.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-4
8.2.1.2	Selection of Environmental Effects and Measurable Parameters	8-5
8.2.1.3	Temporal Boundaries	8-6
8.2.1.4	Spatial Boundaries	8-6
8.2.1.5	Administrative and Technical Boundaries	8-7
8.2.1.6	Residual Environmental Effects Significance Criteria	8-12
8.2.2	Existing Conditions	8-13
8.2.2.1	Climate	8-13
8.2.2.2	Ambient Air Quality	8-17
8.2.2.2.1	Provincial Ambient Air Quality Monitoring	8-17
8.2.2.2.2	Ambient Air Quality Monitoring Within the LAA	8-18
8.2.2.3	Air Contaminant and GHG Emissions	8-21
8.2.3	Potential Project-VEC Interactions	8-22
8.2.4	Assessment of Project-Related Environmental Effects	8-23
8.2.4.1	Potential Project Environmental Effects Mechanisms	8-26
8.2.4.2	Mitigation of Project Environmental Effects	8-26
8.2.4.3	Characterization of Residual Project Environmental Effects	8-27
8.2.5	Assessment of Cumulative Environmental Effects	8-28
8.2.6	Determination of Significance	8-31
8.2.6.1	Residual Project Environmental Effects	8-31
8.2.6.2	Residual Cumulative Environmental Effects	8-31
8.2.7	Follow-up or Monitoring	8-31
8.3	ACOUSTIC ENVIRONMENT	8-33
8.3.1	Scope of Assessment	8-34
8.3.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-34
8.3.1.2	Selection of Environmental Effect and Measurable Parameters	8-35
8.3.1.3	Temporal Boundaries	8-35
8.3.1.4	Spatial Boundaries	8-35
8.3.1.5	Administrative and Technical Boundaries	8-36
8.3.1.6	Residual Environmental Effects Significance Criteria	8-40
8.3.2	Existing Conditions	8-40
8.3.3	Potential Project-VEC Interactions	8-46

8.3.4	Assessment of Project-Related Environmental Effects	8-48
8.3.4.1	Potential Project Environmental Effects Mechanisms	8-51
8.3.4.2	Mitigation of Project Environmental Effects	8-51
8.3.4.3	Characterization of Residual Project Environmental Effects	8-52
8.3.5	Assessment of Cumulative Environmental Effects	8-53
8.3.6	Determination of Significance	8-55
8.3.6.1	Residual Project Environmental Effects.....	8-55
8.3.6.2	Residual Cumulative Environmental Effects	8-55
8.3.7	Follow-up or Monitoring	8-55
<hr/>		
8.4	WATER RESOURCES	8-57
8.4.1	Scope of Assessment	8-59
8.4.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-59
8.4.1.2	Selection of Environmental Effect and Measurable Parameters	8-60
8.4.1.3	Temporal Boundaries	8-61
8.4.1.4	Spatial Boundaries	8-61
8.4.1.5	Administrative and Technical Boundaries.....	8-62
8.4.1.6	Residual Environmental Effects Significance Criteria	8-65
8.4.2	Existing Conditions	8-65
8.4.2.1	Climate and Water Resources.....	8-65
8.4.2.1.1	Precipitation Analysis.....	8-66
8.4.2.1.2	Extreme Precipitation.....	8-67
8.4.2.1.3	Environmental Water Balance	8-68
8.4.2.2	Hydrological Conditions.....	8-68
8.4.2.2.1	Watershed Delineation	8-68
8.4.2.2.2	Stream Flow	8-69
8.4.2.2.3	Surface Water Quality.....	8-76
8.4.2.2.4	Surface Water Users	8-83
8.4.2.3	Groundwater	8-84
8.4.2.3.1	Bedrock Geology	8-84
8.4.2.4	Surficial Geology	8-87
8.4.2.4.1	Hydrogeologic Setting.....	8-87
8.4.2.4.2	Groundwater Quality.....	8-97
8.4.2.4.3	Groundwater Users.....	8-101
8.4.3	Potential Project-VEC Interactions	8-102
8.4.3.1	Construction.....	8-103
8.4.3.2	Operation	8-104
8.4.3.3	Decommissioning, Reclamation and Closure	8-105
8.4.4	Assessment of Project-Related Environmental Effects	8-106
8.4.4.1	Potential Project Environmental Effects Mechanisms	8-111
8.4.4.1.1	Construction: Physical Construction and Installation of Project Facilities .	8-111
8.4.4.1.2	Operation: Mine Waste and Water Management	8-112

8.4.4.1.3	Decommissioning, Reclamation and Closure: Closure.....	8-113
8.4.4.2	Mitigation of Project Environmental Effects	8-113
8.4.4.3	Characterization of Residual Project Environmental Effects	8-115
8.4.4.3.1	Construction	8-115
8.4.4.3.2	Operation.....	8-124
8.4.4.3.3	Decommissioning, Reclamation and Closure.....	8-129
8.4.5	Assessment of Cumulative Environmental Effects	8-131
8.4.6	Determination of Significance	8-132
8.4.6.1	Residual Project Environmental Effects.....	8-132
8.4.6.2	Residual Cumulative Environmental Effects	8-133
8.4.7	Follow-up or Monitoring	8-133
<hr/>		
8.5	AQUATIC ENVIRONMENT	8-135
8.5.1	Scope of Assessment.....	8-139
8.5.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-139
8.5.1.2	Selection of Environmental Effect and Measurable Parameters	8-140
8.5.1.3	Temporal Boundaries.....	8-142
8.5.1.4	Spatial Boundaries.....	8-142
8.5.1.5	Administrative and Technical Boundaries.....	8-145
8.5.1.5.1	Administrative Boundaries	8-145
8.5.1.5.2	Technical Boundaries	8-151
8.5.1.6	Residual Environmental Effects Significance Criteria	8-152
8.5.2	Existing Conditions	8-153
8.5.2.1	General Setting.....	8-153
8.5.2.2	Methods for the Characterization of Baseline Conditions	8-154
8.5.2.3	Description of the Existing Aquatic Environment	8-161
8.5.2.3.1	Fish Habitat	8-161
8.5.2.3.2	Fish	8-184
8.5.3	Potential Project-VEC Interactions.....	8-189
8.5.3.1	Construction: Activities With a Ranking of 0 or 1	8-190
8.5.3.2	Operation: Activities With a Ranking of 0 or 1	8-192
8.5.3.3	Decommissioning, Reclamation and Closure: Activities With a Ranking of 0 or 1.....	8-193
8.5.3.4	Summary of Activities with a Ranking of 0 or 1.....	8-193
8.5.4	Assessment of Project-Related Environmental Effects	8-193
8.5.4.1	Potential Project Environmental Effects Mechanisms.....	8-199
8.5.4.1.1	Construction	8-199
8.5.4.1.2	Operation.....	8-200
8.5.4.1.3	Decommissioning, Reclamation and Closure.....	8-204
8.5.4.2	Mitigation of Project Environmental Effects	8-205
8.5.4.2.1	TSF Site Selection and Design	8-206
8.5.4.2.2	Fish Relocation.....	8-206

8.5.4.2.3	Mine Waste and Water Management.....	8-206
8.5.4.2.4	Fish Habitat Compensation.....	8-207
8.5.4.3	Characterization of Residual Project Environmental Effects	8-208
8.5.4.3.1	Construction	8-208
8.5.4.3.2	Operation.....	8-210
8.5.4.3.3	Decommissioning, Reclamation and Closure.....	8-235
8.5.4.3.4	Summary of the Residual Environmental Effects of Decommissioning, Reclamation and Closure.....	8-237
8.5.5	Assessment of Cumulative Environmental Effects	8-237
8.5.5.1	Cumulative Environmental Effects Mechanisms	8-241
8.5.5.2	Mitigation of Cumulative Environmental Effects.....	8-241
8.5.5.3	Characterization of Residual Cumulative Environmental Effects	8-242
8.5.6	Determination of Significance	8-243
8.5.6.1	Residual Project Environmental Effects.....	8-243
8.5.6.2	Residual Cumulative Environmental Effects	8-244
8.5.7	Follow-up or Monitoring	8-245
8.6	Terrestrial Environment	8-247
8.6.1	Scope of Assessment.....	8-248
8.6.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-248
8.6.1.2	Selection of Environmental Effect and Measurable Parameters	8-249
8.6.1.3	Temporal Boundaries.....	8-250
8.6.1.4	Spatial Boundaries	8-250
8.6.1.5	Administrative and Technical Boundaries.....	8-257
8.6.1.6	Residual Environmental Effects Significance Criteria	8-259
8.6.2	Existing Conditions	8-260
8.6.2.1	Habitat Overview.....	8-260
8.6.2.2	Managed Wildlife Habitats.....	8-265
8.6.2.2.1	Conservation Forest	8-265
8.6.2.2.2	Deer Wintering Areas	8-265
8.6.2.2.3	Protected Natural Areas (PNAs)	8-265
8.6.2.3	Interior Forest.....	8-266
8.6.2.4	Wildlife	8-266
8.6.2.4.1	Birds	8-279
8.6.2.4.2	Mammals and Herpetiles	8-282
8.6.2.4.3	Winter Track Surveys	8-283
8.6.2.4.4	Aerial Wildlife Survey.....	8-284
8.6.2.5	Species at Risk (SAR).....	8-285
8.6.2.6	Species of Conservation Concern (SOCC).....	8-293
8.6.3	Potential Project-VEC Interactions.....	8-299
8.6.4	Assessment of Project-Related Environmental Effects	8-303
8.6.4.1	Potential Project Environmental Effects Mechanisms.....	8-308
8.6.4.2	Mitigation of Project Environmental Effects	8-310

8.6.4.3	Characterization of Residual Project Environmental Effects	8-312
8.6.4.3.1	Habitat	8-312
8.6.4.3.2	Wildlife	8-313
8.6.5	Assessment of Cumulative Environmental Effects	8-316
8.6.6	Determination of Significance	8-319
8.6.6.1	Residual Project Environmental Effects	8-319
8.6.6.2	Residual Cumulative Environmental Effects	8-319
8.6.7	Follow-up or Monitoring	8-320
<hr/>		
8.7	VEGETATED ENVIRONMENT	8-321
8.7.1	Scope of Assessment	8-322
8.7.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-322
8.7.1.2	Selection of Environmental Effect and Measurable Parameters	8-323
8.7.1.3	Temporal Boundaries	8-324
8.7.1.4	Spatial Boundaries	8-324
8.7.1.5	Administrative and Technical Boundaries	8-327
8.7.1.6	Residual Environmental Effects Significance Criteria	8-329
8.7.2	Existing Conditions	8-329
8.7.2.1	Overview	8-329
8.7.2.2	Methods Used to Establish Existing Conditions	8-331
8.7.2.2.1	Information Sources	8-331
8.7.2.2.2	Remote Sensing, Modelling, and Field Surveys	8-331
8.7.2.3	Vegetation Communities	8-333
8.7.2.4	Vascular Plant Populations (including SAR and SOCC)	8-339
8.7.3	Potential Project-VEC Interactions	8-350
8.7.4	Assessment of Project-Related Environmental Effects	8-353
8.7.4.1	Potential Project Environmental Effects Mechanisms	8-358
8.7.4.2	Mitigation of Project Environmental Effects	8-359
8.7.4.3	Characterization of Residual Project Environmental Effects	8-361
8.7.5	Assessment of Cumulative Environmental Effects	8-364
8.7.5.1	Cumulative Environmental Effects Mechanisms	8-369
8.7.5.2	Mitigation of Cumulative Environmental Effects	8-369
8.7.5.3	Characterization of Residual Cumulative Environmental Effects	8-369
8.7.6	Determination of Significance	8-370
8.7.6.1	Residual Project Environmental Effects	8-370
8.7.6.2	Residual Cumulative Environmental Effects	8-370
8.7.7	Follow-up or Monitoring	8-370
<hr/>		
8.8	WETLAND ENVIRONMENT	8-371
8.8.1	Scope of Assessment	8-371
8.8.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-371
8.8.1.2	Selection of Environmental Effect and Measurable Parameters	8-374

8.8.1.3	Temporal Boundaries	8-374
8.8.1.4	Spatial Boundaries	8-375
8.8.1.5	Administrative and Technical Boundaries	8-376
8.8.1.6	Residual Environmental Effects Significance Criteria	8-381
8.8.2	Existing Conditions	8-382
8.8.2.1	Overview	8-382
8.8.2.2	Wetland Evaluation Methods	8-383
8.8.2.2.1	Information Sources	8-383
8.8.2.2.2	Remote Sensing, Modelling, and Field Surveys	8-383
8.8.2.3	Wetlands in the LAA	8-384
8.8.2.3.1	Wetland Function	8-400
8.8.3	Potential Project-VEC Interactions	8-405
8.8.4	Assessment of Project-Related Environmental Effects	8-408
8.8.4.1	Potential Project Environmental Effects Mechanisms	8-413
8.8.4.2	Mitigation of Project Environmental Effects	8-414
8.8.4.2.1	Wetland Mitigation in New Brunswick	8-415
8.8.4.3	Characterization of Residual Project Environmental Effects	8-416
8.8.4.3.1	Direct Loss of GeoNB-mapped Wetlands	8-417
8.8.4.3.2	Direct Loss of Unmapped Wetlands	8-418
8.8.4.3.3	Percent Loss within the RAA	8-420
8.8.4.3.4	Indirect Loss of Wetlands	8-421
8.8.4.3.5	Provincially Significant Wetlands	8-422
8.8.5	Assessment of Cumulative Environmental Effects	8-425
8.8.5.1	Cumulative Environmental Effects Mechanisms	8-429
8.8.5.2	Mitigation of Cumulative Environmental Effects	8-430
8.8.5.3	Characterization of Residual Cumulative Environmental Effects	8-430
8.8.6	Determination of Significance	8-430
8.8.6.1	Residual Project Environmental Effects	8-430
8.8.6.2	Residual Cumulative Environmental Effects	8-431
8.8.7	Follow-up or Monitoring	8-431
<hr/>		
8.9	PUBLIC HEALTH AND SAFETY	8-433
8.9.1	Scope of Assessment	8-434
8.9.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-435
8.9.1.2	Selection of Environmental Effects and Measurable Parameters	8-435
8.9.1.3	Temporal Boundaries	8-436
8.9.1.4	Spatial Boundaries	8-436
8.9.1.5	Administrative and Technical Boundaries	8-439
8.9.1.6	Residual Environmental Effects Significance Criteria	8-443
8.9.2	Existing Conditions	8-443
8.9.2.1	Current Health Status	8-443
8.9.2.1.1	Mortality	8-444

8.9.2.1.2	Cancer Incidence.....	8-444
8.9.2.1.3	Cardiovascular Disease.....	8-445
8.9.2.1.4	Neurodegenerative Diseases.....	8-446
8.9.2.1.5	Mental Health.....	8-446
8.9.2.1.6	Obesity.....	8-446
8.9.2.1.7	Teenage Pregnancy.....	8-447
8.9.2.1.8	Injury.....	8-447
8.9.2.1.9	Injuries in Sport, Recreation and Exercise.....	8-448
8.9.2.1.10	Workplace Health and Safety.....	8-448
8.9.2.2	Predicted Baseline Human Health Risks – Existing Environmental Contaminant Concentrations.....	8-448
8.9.2.2.1	Predicted Baseline Health Risks via Inhalation.....	8-449
8.9.2.2.2	Predicted Baseline Health Risks via Ingestion of and Dermal Contact with Soil.....	8-450
8.9.2.2.3	Predicted Baseline Health Risks via Ingestion of Food.....	8-450
8.9.2.2.4	Predicted Baseline Health Risks via Ingestion of Water.....	8-451
8.9.3	Potential Project-VEC Interactions.....	8-451
8.9.3.1	Potential Interactions With a Change in Public Health.....	8-452
8.9.3.2	Potential Interactions With a Change in Public Safety.....	8-453
8.9.4	Assessment of Project-Related Environmental Effects.....	8-454
8.9.4.1	Potential Project Environmental Effects Mechanisms.....	8-457
8.9.4.2	Mitigation of Project Environmental Effects.....	8-458
8.9.4.3	Characterization of Residual Project Environmental Effects.....	8-458
8.9.4.3.1	Health Risks via Inhalation.....	8-459
8.9.4.3.2	Health Risks via Ingestion of Soil and Dermal Contact with Soil.....	8-460
8.9.4.3.3	Health Risks via Ingestion of Food.....	8-461
8.9.4.3.4	Health Risks via Ingestion of Water.....	8-462
8.9.4.3.5	Summary.....	8-462
8.9.5	Assessment of Cumulative Environmental Effects.....	8-462
8.9.6	Determination of Significance.....	8-464
8.9.6.1	Residual Project Environmental Effects.....	8-464
8.9.6.2	Residual Cumulative Environmental Effects.....	8-464
8.9.7	Follow-up or Monitoring.....	8-465
8.10	LABOUR AND ECONOMY.....	8-467
8.10.1	Scope of Assessment.....	8-468
8.10.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement.....	8-468
8.10.1.2	Selection of Environmental Effects and Measurable Parameters.....	8-469
8.10.1.3	Temporal Boundaries.....	8-470
8.10.1.4	Spatial Boundaries.....	8-470
8.10.1.5	Administrative and Technical Boundaries.....	8-473
8.10.1.6	Residual Environmental Effects Significance Criteria.....	8-474

8.10.2 Existing Conditions	8-474
8.10.2.1 Population Demographics	8-474
8.10.2.2 Economy	8-475
8.10.2.2.1 New Brunswick	8-475
8.10.2.2.2 York County	8-476
8.10.2.2.3 Carleton County	8-476
8.10.2.3 Labour	8-477
8.10.2.3.1 New Brunswick	8-477
8.10.2.3.2 York County	8-478
8.10.2.3.3 Carleton County	8-479
8.10.3 Potential Project-VEC Interactions	8-480
8.10.4 Assessment of Project-Related Environmental Effects	8-483
8.10.4.1 Potential Project Environmental Effects Mechanisms	8-486
8.10.4.2 Mitigation of Project Environmental Effects	8-487
8.10.4.3 Characterization of Residual Project Environmental Effects	8-487
8.10.5 Assessment of Cumulative Environmental Effects	8-492
8.10.6 Determination of Significance	8-493
8.10.6.1 Residual Project Environmental Effects	8-493
8.10.6.2 Residual Cumulative Environmental Effects	8-494
8.10.7 Follow-up or Monitoring	8-494
<hr/>	
8.11 COMMUNITY SERVICES AND INFRASTRUCTURE	8-495
8.11.1 Scope of Assessment	8-496
8.11.1.1 Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-496
8.11.1.2 Selection of Environmental Effect and Measurable Parameters	8-497
8.11.1.3 Temporal Boundaries	8-498
8.11.1.4 Spatial Boundaries	8-498
8.11.1.5 Administrative and Technical Boundaries	8-501
8.11.1.6 Residual Environmental Effects Significance Criteria	8-501
8.11.2 Existing Conditions	8-501
8.11.2.1 Municipal Administration	8-502
8.11.2.2 Education	8-502
8.11.2.3 Permanent Housing	8-503
8.11.2.4 Temporary Accommodations	8-504
8.11.2.5 Policing	8-505
8.11.2.6 Fire Protection	8-506
8.11.2.7 Community Health	8-507
8.11.2.8 Recreation and Entertainment	8-510
8.11.3 Potential Project-VEC Interactions	8-513
8.11.4 Assessment of Project-Related Environmental Effects	8-514
8.11.4.1 Potential Project Environmental Effects Mechanisms	8-517
8.11.4.2 Mitigation of Project Environmental Effects	8-517

8.11.4.3	Characterization of Residual Project Environmental Effects	8-518
8.11.5	Assessment of Cumulative Environmental Effects	8-521
8.11.6	Determination of Significance	8-523
8.11.6.1	Residual Project Environmental Effects.....	8-523
8.11.6.2	Residual Cumulative Environmental Effects	8-523
8.11.7	Follow-up or Monitoring	8-524
<hr/>		
8.12	LAND AND RESOURCE USE	8-525
8.12.1	Scope of Assessment	8-526
8.12.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-526
8.12.1.2	Selection of Environmental Effect and Measurable Parameters	8-527
8.12.1.3	Temporal Boundaries	8-527
8.12.1.4	Spatial Boundaries	8-528
8.12.1.5	Administrative and Technical Boundaries.....	8-528
8.12.1.6	Residual Environmental Effects Significance Criteria	8-533
8.12.2	Existing Conditions	8-533
8.12.3	Potential Project-VEC Interactions	8-539
8.12.4	Assessment of Project-Related Environmental Effects	8-543
8.12.4.1	Potential Project Environmental Effects Mechanisms	8-546
8.12.4.2	Mitigation of Project Environmental Effects	8-546
8.12.4.3	Characterization of Residual Project Environmental Effects	8-547
8.12.5	Assessment of Cumulative Environmental Effects	8-556
8.12.6	Determination of Significance	8-558
8.12.6.1	Residual Project Environmental Effects.....	8-558
8.12.6.2	Residual Cumulative Environmental Effects	8-558
8.12.7	Follow-up or Monitoring	8-558
<hr/>		
8.13	CURRENT USE OF LAND AND RESOURCES FOR TRADITIONAL PURPOSES BY ABORIGINAL PERSONS	8-559
8.13.1	Scope of Assessment	8-560
8.13.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-560
8.13.1.2	Selection of Environmental Effect and Measurable Parameters	8-561
8.13.1.3	Temporal Boundaries	8-562
8.13.1.4	Spatial Boundaries	8-562
8.13.1.5	Administrative and Technical Boundaries.....	8-565
8.13.1.6	Residual Environmental Effects Significance Criteria	8-566
8.13.2	Existing Conditions	8-566
8.13.2.1	First Nation Communities and Population in New Brunswick.....	8-566
8.13.2.2	Traditional Territory	8-570
8.13.2.3	Indigenous Knowledge Study (IKS).....	8-571
8.13.2.4	Forest Resource Harvesting.....	8-573
8.13.3	Potential Project-VEC Interactions	8-573

8.13.4	Assessment of Project-Related Environmental Effects	8-578
8.13.4.1	Potential Project Environmental Effects Mechanisms	8-582
8.13.4.2	Mitigation of Project Environmental Effects	8-582
8.13.4.3	Characterization of Residual Project Environmental Effects	8-583
8.13.5	Assessment of Cumulative Environmental Effects	8-584
8.13.6	Determination of Significance	8-590
8.13.6.1	Residual Project Environmental Effects.....	8-590
8.13.6.2	Residual Cumulative Environmental Effects	8-590
8.13.7	Follow-up or Monitoring	8-590
<hr/>		
8.14	HERITAGE RESOURCES.....	8-591
8.14.1	Scope of Assessment.....	8-592
8.14.1.1	Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement	8-592
8.14.1.2	Selection of Environmental Effect and Measurable Parameter	8-594

LIST OF APPENDICES

(VOLUME 2)

- Appendix A List of Acronyms and Units
- Appendix B Glossary of Selected Terms
- Appendix C Tables of Concordance (Cross-Referenced Index with Final Guidelines, and Terms of Reference)
- Appendix D Environmental and Social Management System (ESMS)
- Appendix E Conceptual Fish Habitat Compensation Plan
